LISTING OF THE CLAIMS:

The following is a complete listing of all the claims in the application, with an indication of the status of each:

1 1. (Currently amended) A virtual Point-of-Sale (POS) system for a retail store 2 comprising: 3 a remote activator device carried by a sales associate and connected by a computer 4 network installed in the retail store to a computer with installed back office application 5 software for at least one of accounting and inventory: 6 a positioning system which recognizes a signal from the remote activator device and determines where and how to find an appropriate blank surface near the sales 7 8 associate's actual location; 9 an integrated projector and camera assembly responsive to the positioning system 10 and which rotates to a correct position and displays a POS application on a blank surface 11 near the location of the sales associate, the camera detecting entries in the POS 12 application by the sales associate as interactions with the displayed POS application; 13 a scanner used by the sales associate for scanning merchandise codes to enter 14 purchases in the displayed POS application; and 15 a magnetic stripe reader for reading a credit or debit card to complete transaction 16 in the displayed POS application.

- 1 2. (Original) The virtual Point-of-Sale (POS) system for a retail store recited in claim 1,
- 2 wherein said remote activator device, said scanner and said magnetic stripe reader are
- 3 each part of an integrated device carried by the sales associate.
- 1 3. (Original) The virtual Point-of-Sale (POS) system for a retail store recited in claim 2,
- wherein in the integrated device further includes a printer for printing a sales receipt.

- 1 4. (Original) The virtual Point-of-Sale (POS) system for a retail store recited in claim 1,
- wherein the signal from the remote activator is a wireless signal conforming to a
- 3 standardized protocol.
- 1 5. (Original) The virtual Point-of-Sale (POS) system for a retail store recited in claim 1,
- 2 wherein the positioning system uses a positioning algorithm to determine where and how
- 3 to find a blank surface near the sales associate's actual location.
- 1 6. (Original) The virtual Point-of-Sale (POS) system for a retail store recited in claim 1,
- 2 wherein the remote activator device transmits location information to the positioning
- 3 system for use in determining where and how to find a blank surface near the sales
- 4 associate's actual location.
 - 7-9. (Non-elected claims pursuant to a restriction requirement)
- 1 10. (New) The virtual Point-of-Sale (POS) system for a retail store recited in claim 1,
- 2 wherein said computer is a server.
- 1 11. (New) The virtual Point-of-Sale (POS) system for a retail store recited in claim 1,
- 2 wherein said computer is connected to a credit card processor.
- 1 12. (New) The virtual Point-of-Sale (POS) system for a retail store recited in claim 11,
- 2 wherein the computer connection to the credit card processor is made using a dial-up
- 3 network.
- 1 13. (New) The virtual Point-of-Sale (POS) system for a retail store recited in claim 11,
- 2 wherein the computer connection to the credit card processor is made using a VPN.

- 1 14. (New) The virtual Point-of-Sale (POS) system for a retail store recited in claim 11,
- 2 wherein the credit card processor is connected to at least one of an outside bank and an
- 3 outside credit institution.
- 1 15. (New) The virtual Point-of-Sale (POS) system for a retail store recited in claim 2,
- wherein said integrated device further comprises a keypad.
- 1 16. (New) The virtual Point-of-Sale (POS) system for a retail store recited in claim 15,
- wherein said keypad may be used for entering a PIN number.
